

FOR EFFECTIVE SITE MANAGEMENT SYSTEMS AND SERVICE

NOW IS THE TIME –

Onsite facility management via CCTV and the Internet has never been more relevant than it is today.

A combination of additional responsibilities places a considerable increase in liability risk upon management.

Underwritten financial exposure is increasingly expensive and improved risk management has to be a serious objective for progressive organisations.

THE NEED

Householder Waste Segregation & Civic Amenity Sites are the fountain head of the re-cycling phenomenon that has created one of the fastest growing industries of this century but it has brought with it a vast array of new risk management responsibilities and liabilities.

SOLUTION PROVIDER

Onwatch is proud to be in the forefront of solution suppliers to 15 County Councils and a major proportion of Waste Management Contractors for site management systems at Household Waste Recycling Centres, Civic Amenity Centres, Transfer Stations, and Materials Recycling Facilities.

County locations of Onwatch HWRC & Civic Amenity Site systems:

Cheshire	Lincolnshire
Cornwall	Norfolk
Dumfries & Galloway	Oxfordshire
East Sussex	Somerset
Essex	Suffolk
Flintshire	Surrey
Hampshire	West Sussex
Kent	

SYSTEMS INTEGRATOR

Onwatch specifies, supplies, installs, monitors and provides full aftercare services for CCTV and Automatic Number Plate Recognition systems for County Councils and their Waste Management Contractors - nationwide. These systems are proving invaluable to them and are now an essential element for future waste management contract tenders.

MEETING THE NEED

Working with Local Authorities and Contractors, Onwatch has integrated systems to meet very demanding requirements for site security, health & safety, site management and illegal activity control such as trade waste and weighbridge infringements.

TECHNICAL SOLUTIONS

Systems capable of on-site and off-site monitoring and networked for 'anywhere, any-when' management inspection are now the norm. However, using IP over jealously guarded IT networks is not without its headaches and needs the experience of a dedicated IP team to steer it through to fulfilment.

PROFESSIONAL RESPONSIBILITY

Onwatch has specialists in all of the disciplines for a successful system install, off site monitoring and aftercare services. In this 'one stop shop' concept Onwatch accepts responsibility for the operational quality of all of the end result services. Not so many system suppliers are able to make this claim.

PROFESSIONAL EXPERTISE

Onwatch knows the business and is willing and able to assist with the preparation and implementation of effective site management projects and in the adoption and upgrading of under performing systems.

CALL US
